

1. Splash Screen

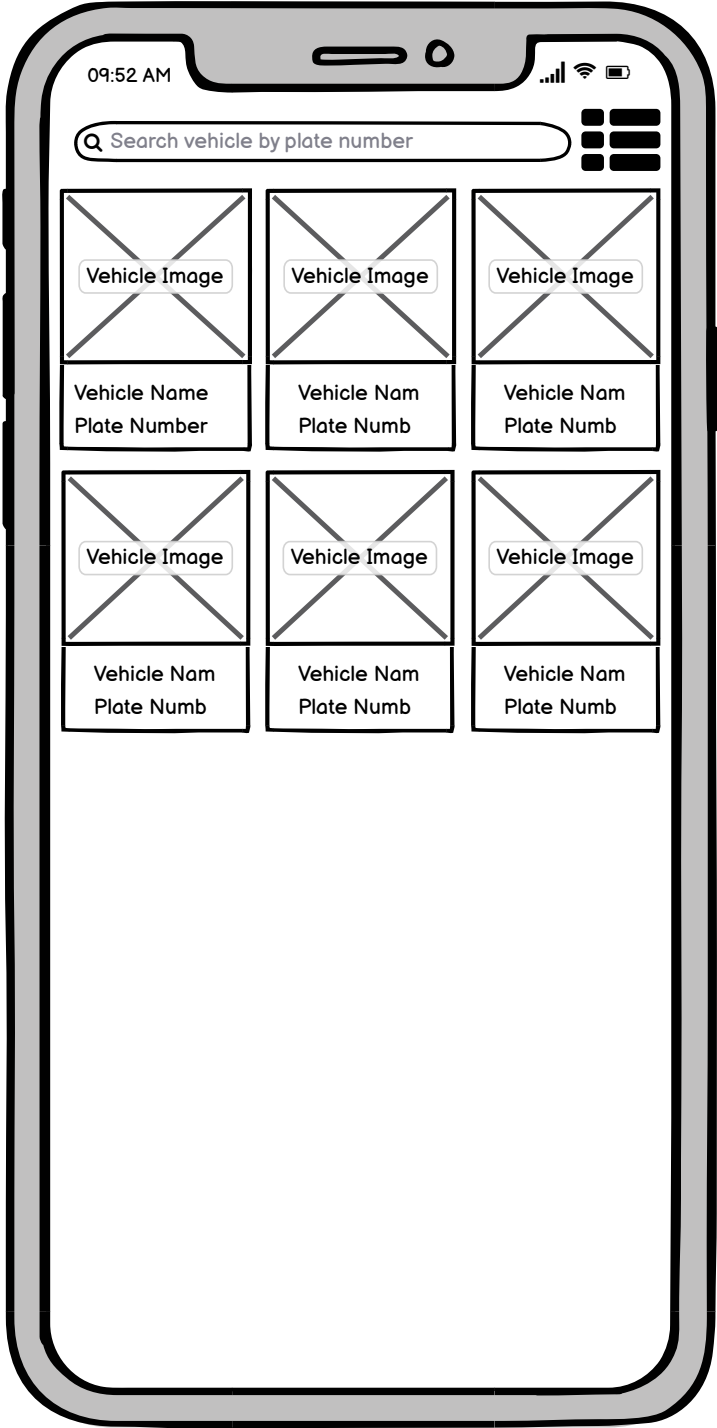

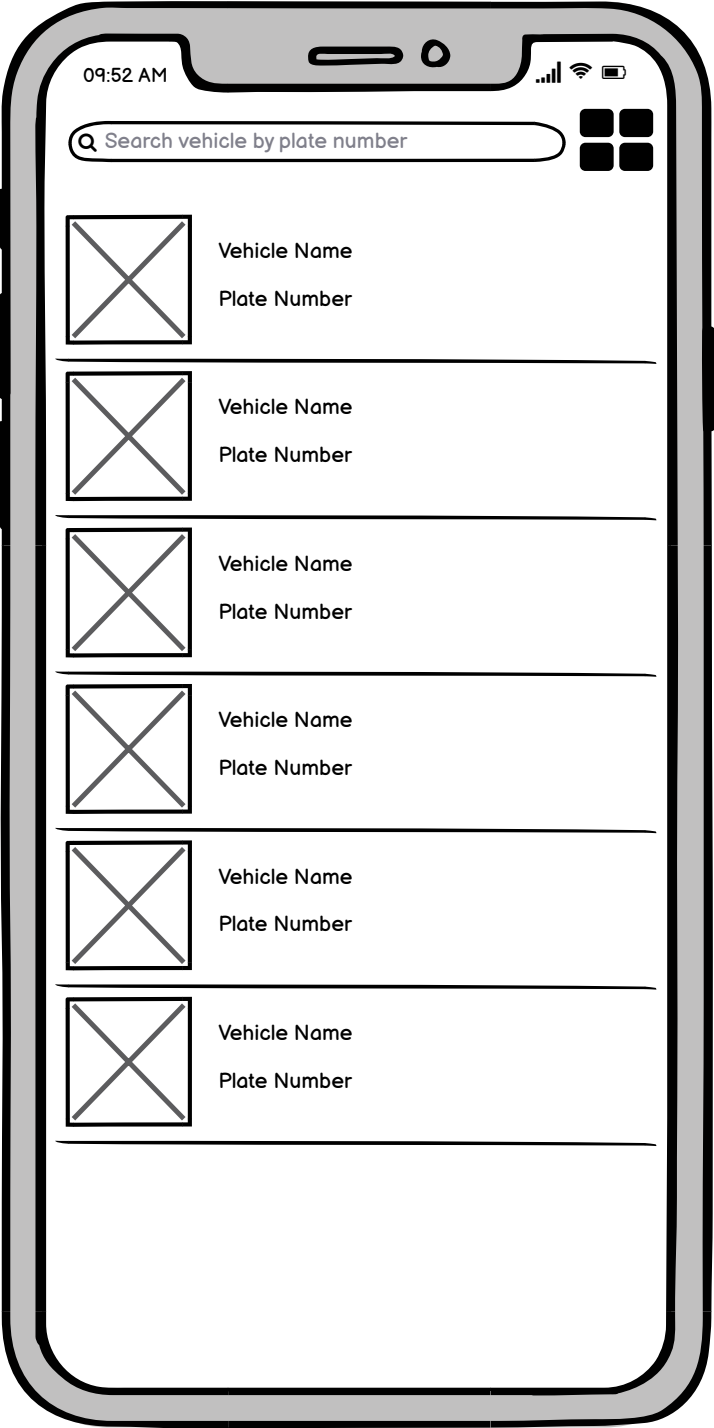

I think, Jac is better for this screen.

## 2. Login Screen

- Driver Name: Name of Driver. Drivers can input their name
- Phone Number: Phone number of driver. Drivers can input their number
- Sign In: Sign In Button.

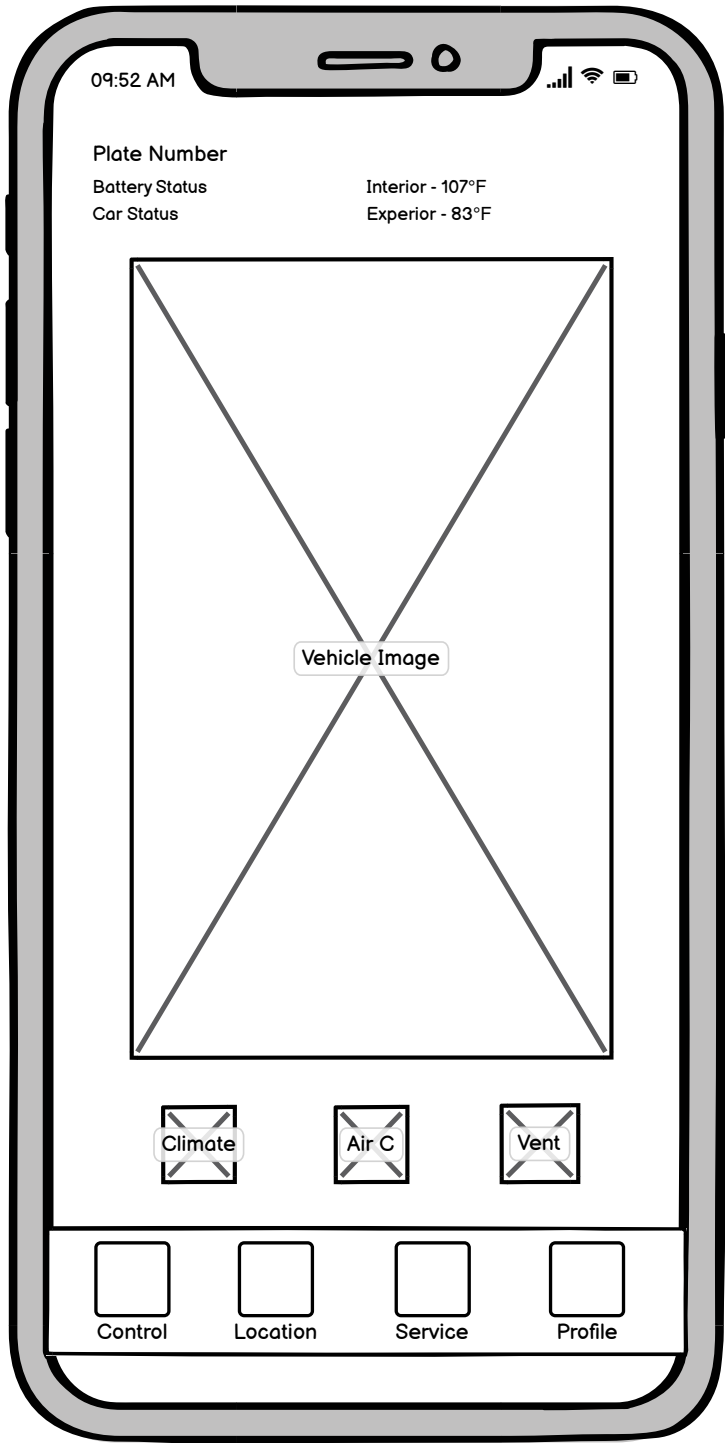

### 3. Pick Vehicle

This screen will show vehicle list in their depot.

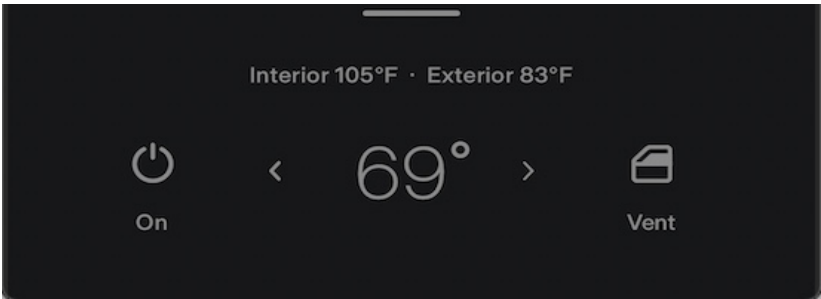

- There is a search bar. Driver can search the vehicle with plate number.
- Driver can change displaying layout of vehicles by tapping button of top-left screen.
- When user choose a vehicle, all will direct to vehicle control screen.

4. Car Control Screen

This screen is belong to first tab (Control tab at the bottom of screen)

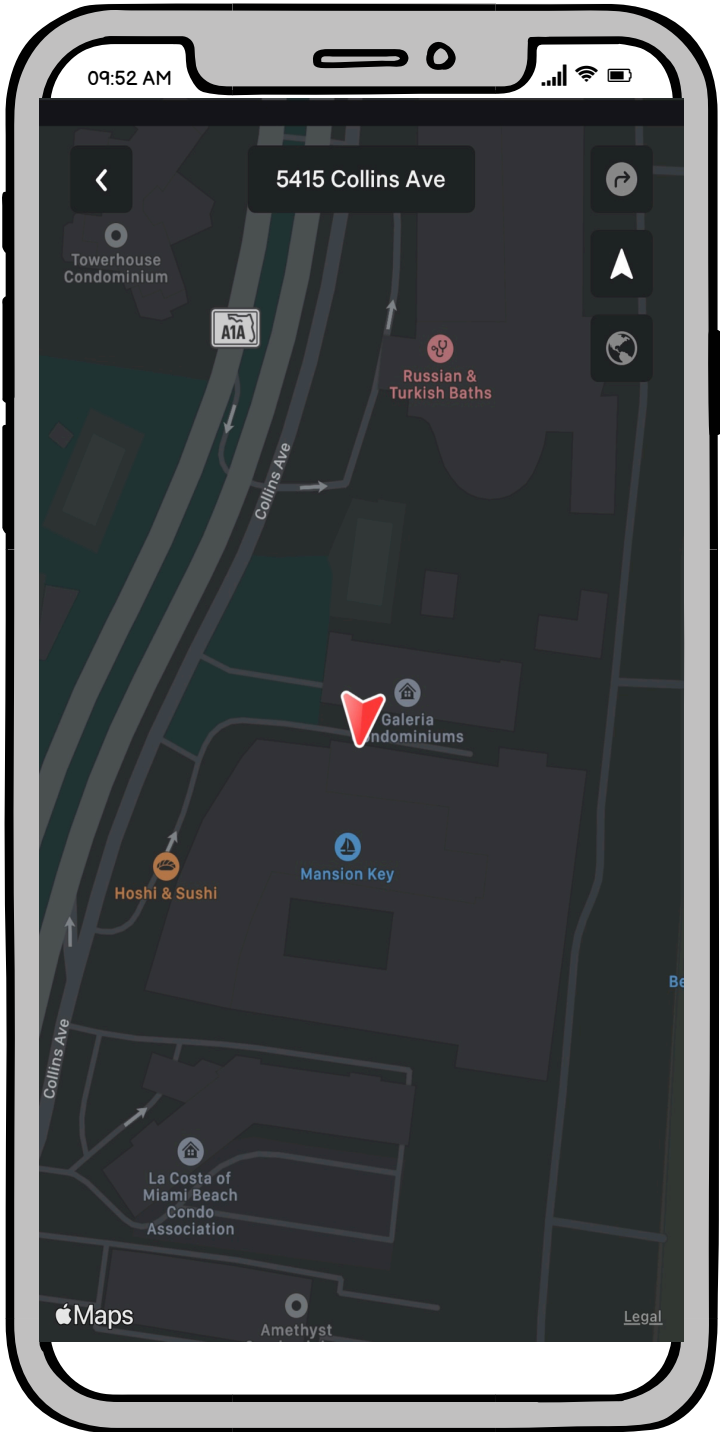

- 1) Plate Number: Plate Number of Vehicle
- 2) Battery Status: Remaining Battery Percentage
- 3) Vehicle Status: Parked, Driving, Charging, etc
- 4) Vehicle Image: Image of Car Model
- 5) Control Buttons:
  - Climate: When user tapped, App will show dialog for controlling climate  
Icon should be highlighted when it's turn on. Attached the screen example of dialog.
  - Air C: Turn on or off air conditioner. It should be highlighted when turn on.
  - Vent: Control rear wind shield. It should be highlighted when turn on.
- 6) Interior: Displaying inner temperature of vehicle.
- 7) Exterior: Displaying outer temperature of vehicle
- 8) There are 4 tabs at bottom of screen.

This is the screen of dialog when user tapped climate.

I think, Slider is better for setting target temperature, and remove the vent from this dialog.

5. Location Screen

This screen is belong to second tab (Location tab at the bottom of screen)

Map Pin should be able to pointed the car direction.

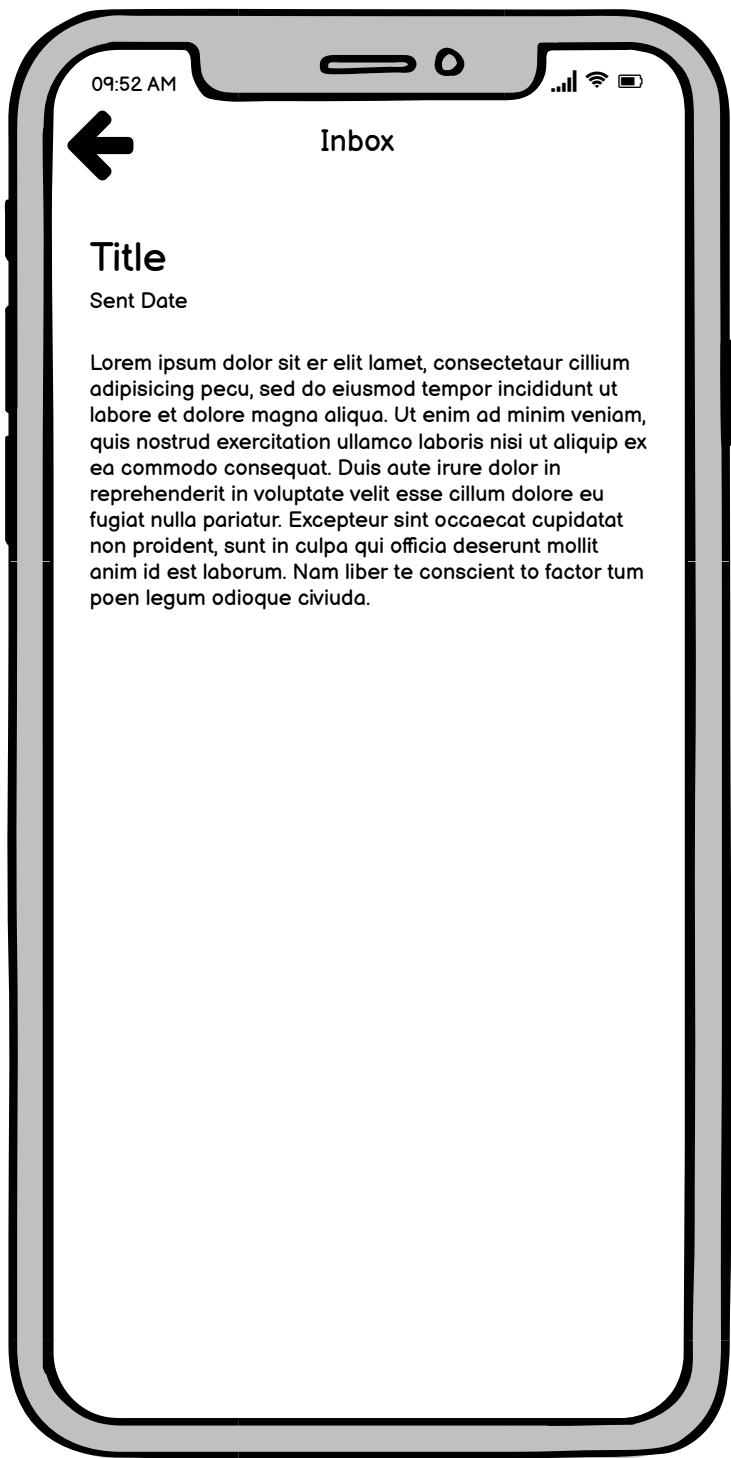

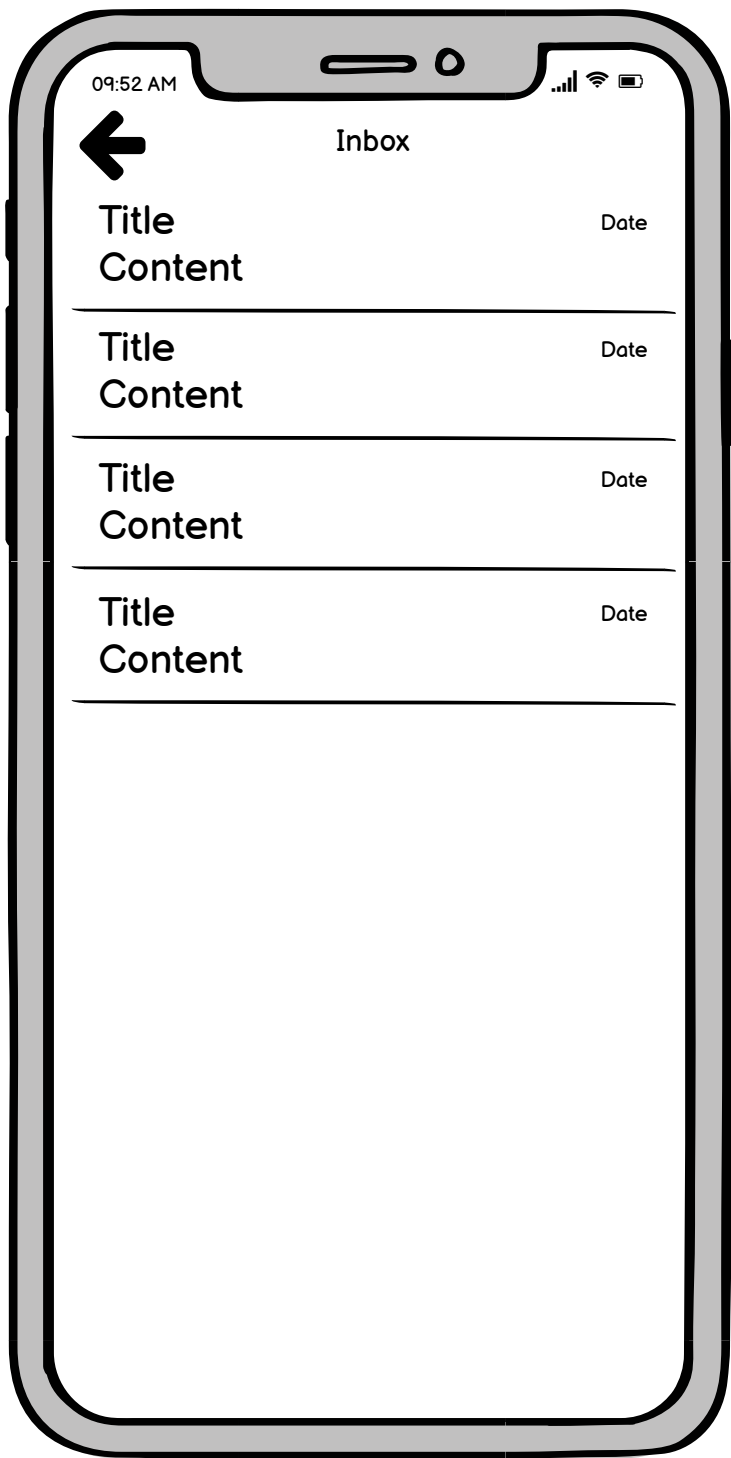

## 6. Profile Screen

This screen is belong to last tab (Profile tab at the bottom of screen)

- |                   |  |
|-------------------|--|
| 1) Profile Image: | Displaying driver's profile image. Driver can edit his profile image also. |
| 2) Driver Name:   | Driver Name. Driver can't change their name                                |
| 3) Phone Number:  | Phone Number of drivers. Driver can't change his number.                   |
| 4) Inbox:         | Drivers can see the mails from system or depot manager                     |
| 5) Report:        | Drivers can send mail to portal or depot manager                           |
| 6) Sign Out       |  |

7. Inbox and detail screen

Inbox screen will display the list of mails which driver got from system or depot manager.

If user tap the one of them, app will show the detail screen.

# 8. Report Screen

09:52 AM

←

Report

Report Type

Report Title

Report Detail

Send

1. Report Type:  
or

2. Report Title:  
type.

3. Report Detail:

Driver can pick the type of problem what they want to report to system depot manager

If drivers can't find the right type from dropdown, they can pick "other"  
,and then they input the title / subject what they want to report.

This is the content of report.
